Weatherization

Since 1978, Central Vermont Community Action Council's (CVCAC) Weatherization Program has helped over 8,000 households to stay warm. Weatherizing your home will lower your heating bills, improve the comfort and durability of your home plus save energy. Priorities include tuning up your heating system, improving your insulation and reducing the draftiness of your home.

Weatherization is free to those households with incomes under limits set by the State of Vermont.

ELIGIBILITY CRITERIA
(Effective Oct. 1, 2007 to Sept. 30, 2008)

Household Size	Annual Income
1	\$22,271
2	\$29,124
3	\$35,977
4	\$42,829
5	\$49,682
6	\$56,535
7	\$57,819
8	\$59,104

each additional person add \$1,285

The program is also available at no cost if during the last year you received benefits from REACH UP (ANFC), SSI/ABD (Supplemental Security Income /Aged, Blind, Disabled) or GA (General Assistance)

CVCAC's Weatherization Program is available to those who rent as well as owners of houses, mobile homes and apartments.

Renters must have permission from their landlords for the work to be done. Participation by the landlord is required.

The Weatherization process starts with a comprehensive energy audit. Energy saving construction services are completed by our certified crews and subcontractors. Capable homeowners can make the investment go further by using our materials and expertise and doing some of the work themselves. Materials can include insulation, caulking, weather-stripping, and other energy related building materials. Homes that were weatherized by CVCAC after September 30, 1993, are not eligible for additional work.

The waiting list for weatherization services is the shortest in spring and summer. CALL TODAY! The sooner you apply, the more money you will save on future Electric and Fuel Bills.
