

Creamy Tomato Bisque

For Pureed Diets

6 - 1 cup servings

Ingredients

- $\frac{2}{3}$ cup Water
- 2 cups Diced Tomatoes
- 1 $\frac{1}{3}$ cup Great Northern Beans, possibly more to thicken
- $\frac{1}{2}$ tsp. Black Pepper
- 1 $\frac{1}{3}$ cups Cream

Directions

- 1 Heat butter and oil in a pan, add the onions and celery and sauté until soft. Stir in thyme.
- 2 Add water and bring to a simmer. If using canned tomatoes, omit the water.
- 3 Add tomatoes and pepper and bring back to a simmer.
- 4 Stir in beans and cream and cook for about 10 minutes until thickened. Puree with a blender.
- 5 Test for thickness, it should not be soupy. It should stand up on a spoon and not drip through a fork. Add more beans and puree again if it needs to be thicker. Add water if you need to thin it.
- 6 You can store this in food storage cubes or other containers for a couple of months in your freezer.

See Tip Sheet for Pureed Foods.

Tips for Pureed Foods

Characteristics

- Are usually eaten with a spoon
- Do not require chewing
- Have a smooth texture with no lumps
- Hold their shape on a spoon
- Fall off a spoon in a single spoonful when tilted
- Are NOT sticky
- Liquids, such as sauces, do not separate from solids

Recommended Equipment

Immersion Blender

For larger quantities an immersion stick type blender works best.

Countertop Blender

For medium or small quantities a countertop blender works best.

Mini Food Processor

For very small quantities a mini food processor works best.

How To Know If the Food is the Right Texture?

Do the Spoon and Fork Tests

Spoon Test

Sample holds its shape on the spoon and falls off fairly easily if the spoon is tilted or lightly flicked.

Sample should **not** be firm or sticky.

Fork Test

Extremely thick liquids sit in a mound or pile above the fork.

A small amount may flow through and form a tail below the fork.

Liquid does **not** dollop, or drip continuously through the fork prongs.

Foods to Avoid That Pose a Choking Hazard

Mixed thin and thick textures	→ Soup with pieces in it, cereal with milk
Hard or dry food	→ Nuts, dry cereal, bread, raw vegetables, bones
Tough or fibrous foods	→ Steak, pineapple
Chewy foods	→ Cheese, dried fruit, marshmallows
Crisp or crunchy foods	→ Crisp bacon, corn flakes, chips
Crumbly bits	→ Dry cake or biscuits
Seeds	→ Pumpkin seeds, white parts of orange
Foods with skins	→ Peas, grapes, sausage skin, salmon skin
Foods with husks	→ Corn, shredded wheat, or bran
Round long shaped foods	→ Grapes or sausage
Sticky or gummy foods	→ Nut butter, overcooked oatmeal, gelatin
Stringy foods	→ Bean, rhubarb
Floppy foods	→ Lettuce, cucumber, uncooked baby spinach leaves
Crust formed during cooking	→ Crust or skin that forms on food during cooking, for example cheese topping or roasting
Juicy foods	→ Where juice separates from the foods in the mouth as in watermelon
Large or hard lumps of food	→ Casserole pieces larger than 4mmx4mmx15mm; fruit, vegetable, meat or other food pieces larger than 4mmx4mmx15mm
